ICE DISPENSE SOLUTIONS from **SCOTSMAN**
Perfect **ICE** with minimal handling & maximum hygiene!

DXN Series - Nugget Ice & Filtered Water Dispensers. The ideal solution for self-service drinks areas, the 'magic-eye' sensor automatically dispenses cubelet ice and chilled water directly into a cup or bottle eliminating any contact with the ice before the serve. Alternatively, the **DXN Series** is perfect for back-counter/bar installation providing ice on demand for a variety of drinks removing the need for potentially unhygienic and easily contaminated ice wells or storage bins.

DXG 35 - Slimline Gourmet Supercube Dispenser. A great solution for guest services, allow guests to serve themselves perfect Gourmet Supercube ice whenever they need it 24 hours a day. The **DXG 35** eliminates unnecessary contact with the ice before it's dispensed into the ice bucket making it as hygienic and as safe as possible.

HD Series - 'Push-For-Ice' Ice Storage Bin/Dispenser. Designed to work with Scotsman MXG Gourmet Supercube or NW Dice Ice modular head units, the **HD Series** ice bin/dispensers removes the conventional ice storage bin from your operation, preventing contamination from human interaction with the ice within the unit, dispense directly into hygienic containers and ice buckets.
NO more dirty ice scoops!
